UNION EUROPEENNE DES MEDECINS SPECIALISTES (UEMS) EUROPEAN UNION OF MEDICAL SPECIALISTS (UEMS)

LOGBOOK OTO-RHINO-LARYNGOLOGY-HEAD AND NECK SURGERY

(revision 2018)

TRAINING PROGRAMME

INTRODUCTION

The UEMS ORL Section and Board of Otorhinolaryngology-Head and Neck Surgery has revised the European training programme for the Specialty in 2018. This programme will serve as a guideline for training centres enabling them to meet the European Standard as set out by the European Board of UEMS. We are moving towards competency based assessments.

DEFINITION

Otorhinolaryngology-Head and Neck Surgery (ORL-HNS) is the specialty which deals with functions and diseases, trauma, malformations and other disorders in childhood and in adults; of the ear, temporal bone and lateral skull base, nose, paranasal sinuses, anterior skull base and orbit, oral cavity, lips, pharynx, larynx, trachea, oesophagus, head, neck, thyroid, salivary and lacrimal glands and adjacent structures and skin. It also includes investigation and treatment of conditions affecting the auditory, vestibular, olfactory and gustatory senses and disorders of the cranial nerves; as well as human communication in respect of speech, language, voice and swallowing disorders. It also includes the study of related genetic disorders. Some of the conditions diagnosed by Otorhinolaryngologists but located in adjoining areas, will be further managed in close cooperation with these related specialists.

THE TRAINING PROGRAMME

The training programme will consist of the following elements:

- 1. Acquisition of the principles of surgery in general and theoretical knowledge of anatomy, physiology, pathology, aetiology and symptomatology and treatment of diseases of the ear, temporal bone and lateral skull base, nose, paranasal sinuses and anterior skull base, oral cavity, pharynx, larynx, trachea, oesophagus, head, neck, thyroid, salivary and lacrimal glands and adjacent structures. Special attention should also be given to the theoretical foundation of audiology, phoniatrics, vestibular disease, allergy, immunology, oncology and the basic principles of plastic and reconstructive surgery.
- 2. Trainees should have access to facilities for temporal bone, paranasal sinus and head and neck dissection. They should be able to familiarize themselves with the basic techniques of surgery on the ear and lateral skull base, nose, paranasal sinuses and anterior skull base, oral cavity, pharynx, larynx, trachea, oesophagus, head, neck, thyroid, salivary and lacrimal glands and adjacent structures, with either real or virtual surgical and endoscopic techniques.
- 3. A graded increase in clinical responsibilities and surgical experience will be developed and should be recorded in the log book.
- 4. A list of diagnostic procedures, non-surgical management and surgical management is outlined in the new UEMS ORL Section and Board logbook.
- 5. The European training programme requires documentation of all skills and operative procedures/management itemized in the section of surgical management. Confirmation of the progression of the trainee to the competency level is required.
- 6. The Log Book will be used in relation to European training exchange programmes and will provide an introduction into advanced skills of the Specialty.
- 7. Subspecialty logbooks are available for advanced trainees.

ASSESSMENT AND EXAMINATION

1. Examination of the theoretical and practical knowledge of the trainee may be included in the European Training Programmes.

Trainees should refer to their National requirements.

- 2. To achieve the award of the certificate of recognition, the trainee must reach the expected level of knowledge and skills approved by the training programme Director before being eligible to practise as an independent ORL-Specialist.
- 3. Each trainee must be familiar with all diagnostic and therapeutic (surgical and non-surgical) management associated with the discipline of Otorhinolaryngology and Head and Neck Surgery.
- 4. The trainer will be responsible for confirming the competence of the trainee for the procedures and management outlined in the log-book in the columns headed "general". He/she will sign on the date when competency is achieved in the final column 6.
- 5. The contents of the log book will be continuously updated by the European Board at least every 5 years with respect to new developments.
- 6. The recommended syllabus for the European Board Exam in ORL-HNS includes this logbook, produced by the UEMS ORL Section, and the Intercollegiate Surgical Curricullum Programme Syllabus.

CONTENT OF THE LOGBOOK

The log book is divided into the following sections.

- I Basic objectives.
- II Otology and Neurotology
- III Nose and paranasal sinuses
- IV Head and Neck
- V Phoniatrics
- VI Facial Plastics and Aesthetic surgery
- VII Paediatric Otolaryngology
- A Diagnostic procedures
- B Non-surgical/Medical management
- C Surgical management

The trainee must have knowledge and understanding both the diagnostic, non-surgical and surgical management.

In the log-book are both general and advanced procedures listed:

General procedures:

Under this heading all items are listed which must be experienced by the end of the training period by every ORL-HNS trainee, in order to guarantee a medical service which fulfils the recommendation of the UEMS Section and Board, to achieve and maintain the highest standards.

Advanced procedures:

Under this heading are listed the skills and operative managements which have to be provided by University centres or specialized departments. The trainee is not expected to be able to perform these procedures/managements during the European Training programme. However, all trainees should have seen and been familiar with these procedures.

The procedures are divided in three categories:

- (S) Trainee requires supervision/assistance by the trainer whilst he/she performs the procedure/management
- (I) Trainee performs the procedure/management independently/alone with the trainer available.
- (A) Trainee has seen/has been familiar with some advanced procedures

The relevant trainer should endorse by signing and dating, when the trainee has achieved competency in each particular management or procedure.

CHARTERS ON TRAINING AND VISITATION

Trainees are advised to familiarize themselves with the UEMS Charter on Training of Medical Specialists www.uems.eu The UEMS ORL Section and Board amended this Charter in June 2001 in relation to the requirements for the Specialty of ORL-HNS. The amended document can be found on the Section Website www.orluems.com.

The website also includes UEMS Charters on:

- 1. Continuing medical education
- 2. Quality assurance
- 3. Visitation of training centres.

The information for the Log Book may also be collected electronically.

I. BASIC OBJEC	TIVES
Knowledge of fundamentals in	
	Signature trainer when competency achieved
emergency medicine and resuscitation	
infection control	
antimicrobial therapy	
transfusions medicine/blood grouping/cross-matching etc.	
haemostasis	
oncology	
wound healing	
general surgical techniques	
basics in plastic and reconstructive surgery	
transplantation medicine	
soft tissue and bone traumatology	
immunology	
endocrinology	
oral and parenteral nutrition	
basic psychosomatic investigation/management	
radiation protection	
medical quality control	
ethical principles/consent for operation	
social welfare legislation	
basic nutritional medicine	
basic laboratory procedures	
basic laboratory investigations,	
correct taking and handling of samples and interpretation of the results	
normal blood values	
bacteriology/mycology	

principal detection of fungi (cell culture)	
antimicrobial medication	
analysis of tumour-markers	
allergology laboratory investigations	

II. OTOLOGY/NEUR	OTOLOGY	
Diseases/Disorders of the ear		
		Signature trainer when competency achieved
Auricle		
Congenital malformations		
Infections		
Inflammatory		
Benign & malignant tumours		
Traumatic injuries		
Ear Canal		
Congenital malformations		
Infections		
Inflammatory		
Benign & malignant tumours		
Exostoses		
Necrotizing otitis externa		
Keratosis obturans/external canal cholesteatoma		
Traumatic injuries		
Ear Drum and Middle Ear		
Congenital malformations		
Acute & chronic otitis media		
Benign & malignant tumours		
Traumatic injuries		
Barotrauma		
Eustachian tube dysfunction		

Conductive hearing loss in adults & children (congenital & acquired)	
Inner Ear and Lateral Skull Base	
Congenital malformations	
Sensorineural hearing loss in adults & children (congenital & acquired)	
Peripheral and central vestibular disorders	
Non-vestibular balance disorders	
Causes of tinnitus (including pulsatile tinnitus) & hyperacusis	
Benign & malignant tumours	
Infective disorders

[
Perinatal history	
History of meningitis	
TORCH infection	
A. Patient assessment and Diagnostic Procedures	
a) Clinical Examination	
	Signature trainer when competency achieved
1. Otoscopy	
2. Microscopy	
3. Oto-endoscopy	
b) Hearing Function	
	Signature trainer when competency achieved
4. Tuning fork tests	
5. Clinical hearing tests	
c) Vestibular function	
	Signature trainer when competency achieved
6. Nystagmus	
7. Head Impulse test (Halmagyi test)	
8. Fistula test	
9. Dix Hallpike test	
10. Heel toe test (tandem gait test)	
11. Unterbergers test	
d) Neurological function	
	Signature trainer when competency achieved
12. Cranial nerve examination including facial nerve	
13. Cerebellar examination	
14. Rombergs Test	
e) Others	
	Signature trainer when competency achieved
15. Auscultation (for bruits)	
B. Diagnostic Work-up	
a) Hearing Function Tests	
	Signature trainer when competency achieved

1. Impedance audiometry	
2. Pure tone audiometry	
3. Speech audiometry	
4. Objective hearing tests	
4a. Oto-acoustic emissions (OAEs)	
4b. Evoked response audiometry (BSER, CERA, ASSR)	
5. Paediatric audiology	
5a. Screening methods	
5b. Subjective methods	
5c. Objective methods	
b) Vestibular Function Tests	
	Signature trainer when competency achieved
6. Caloric testing	
7. Video / Electronystagmography	
8. VEMPs	
9. Posturography (Balance platform)	
10. Rotating chair test	
c) Facial Nerve Function Tests	
	Signature trainer when competency achieved
11. Topodiagnostic testing	
11a. Schirmers test	
11b. Stapedial reflexes	
12. Neurophysiological testing	
12a. Electromyography (EMG)	
12b. Electroneurography (EnoG)	
12c. Maximal stimulation test (MST)	
d) Imaging	
	Signature trainer when competency achieved
13. Plain X-ray	
14. Computerized tomography (to include cone beam CT scanning of the temporal bones)	
15. Magnetic resonance imaging	

16. Angiography				
16a. CT Angiography				
16b. MR Angiography				
16c. Cerebral Angiography				
17. Positron Emission Tomography				
18. Radionuclide scanning eg technetium, gallium scanning				
e) Laboratory Tests				
				Signature trainer when competency achieved
19. Relevant blood tests				
20. Cytology				
21. Histology				
22. Microbiology				
C. Non-Surgical Management				
				Signature trainer when competency achieved
1. Pharmacological treatment				
2. Physical rehabilitation				
3. Ear infections				
4. Sensorineural hearing loss in adults and children (including screening)				
5. Conductive hearing loss in adults and children				
6. Hearing aid rehabilitation				
7. Tinnitus				
8. Vertigo and dysequilibrium				
9. Facial nerve paresis				
10. Peri-operative management of patients undergoing otological surgery				
11. Stereostactic radiosurgery				
D. Surgical Management				
	S	I	Α	Signature trainer when competency achieved

III. NOSE AND PARANASAL SINI	USES
Diseases/Disorders	
	Signature trainer when competency achieved
Nose	
congenital malformations of nose, mid-face (cleft lip, palate), including genetic anomalies	
infections of nose	
Neoplastic conditions:benign and malignant	
nasal and facial trauma	
epistaxis	
inflammatory and allergic conditions (rhino-allergology)	
Paranasal Sinuses	
congenital malformations	
rhinosinusitis: atopic, non-atopic, bacterial, fungal, allergic fungal etc	
Inflammatory and granulomatous systemic conditions including sarcoid,	
tuberculosis etc	
neoplastic conditions: benign and malignant	
barotrauma	
A. Patient assessment and Diagnostic Procedures	
a) History and Clinical Examination	
	Signature trainer when competency achieved
1. Assessment of nasal symptoms	
Specific History: nasal obstruction, rhinorrhoea, anosmia, hyposmia, facial pain, epistaxis	
2. Anterior and posterior rhinoscopy	
3. Nasal endoscopy	

4. visual documentation (example: photography, videoendoscopy)				
5. Ethnic variation, proportions of face, effects of aging				
b) Tests of Function				
				Signature trainer when competency achieved
6. Rhinomanometry				
7. Acoustic rhinomanometry				
8. Olfactory tests (subjective and objective)				
9. Ciliary function tests				
c) Tests of Imaging				
				Signature trainer when competency achieved
10. Conventional X-ray				
11. CT scan				
12. Cone beam CT				
13. MRI scan				
14. Isotope scan				
15. Angiography				
16. Understanding the use of navigation devices				
d) Allergy Investigations				
17. Understanding and performing clinical tests for atopy (such as skin prick tests, RAST,				
nasal provocation tests, etc)				
B. Non-Surgical Management				Cignoture trainer when competency achieved
40				Signature trainer when competency achieved
18. pharmacological therapy				
19. specific immunotherapy (hyposensitisation), sublingual immunotherapy				
20. management of anaphylaxis				
C. Surgical Management

22b. nasal cautery and other endoscopic management		Х		

22c. Medical disease and epistaxis		Χ		
23. Foreign body removal		Χ		
24. Nasal Polypectomy		Χ		
25. Turbinate procedures (including coblation, radiofrequency etc)		Χ		
26. Septal surgery		Χ		
27. Revision septoplasty			Х	
28. Septorhinoplasty (open and closed, reduction, augmentation, grafting techniques, cleft lip septorhinoplasty)			Х	
29. Rhinophyma operation			Х	
30. Correction of congenital malformations (choanal atresia, fistulas, dermoids etc)			Х	
Paranasal Sinuses				
	S	I	Α	Signature trainer when competency achieved
31. Sinus endoscopy		Χ		
32. Antral lavage		Χ		
33. Endoscopic antrostomy and sinus endoscopy		Χ		
34. Radical antrostomy			Х	
35. Frontal sinus trephination			Х	
36. External frontal sinus surgery			Х	
37. External ethmoidectomy			Х	
38. Endoscopic Sinus Surgery and its possible acute complications				
38a) anterior ethmoidectomy		Χ		
38b) posterior ethmoidectomy		Χ		
38c) frontal recess procedures			Х	
38d) sphenoid sinus procedures			Х	
39. Surgery of floor of maxillary sinus			Х	
40. Ligation of maxillary, ethmoidal or sphenopalatine artery including endoscopic			Х	
41. Orbital decompression procedures			Х	
42. Endoscopic dacry-cysto-rhinostomy			Х	
43. Management of CSF leak			Х	
43. Tumour Surgery				
43a) maxillectomy (partial, total)			Х	
43b) lateral rhinotomy			Х	

43c) midfacial degloving			Χ	
43d) combined approach to anterior skull base			Χ	
43e) orbitotomy			Χ	
43f) exenteration of orbit			Χ	
43g) surgery of anterior skull base (incl osteoplastic flap, duraplasty and endoscopic)			Х	
44.Trauma				
44a) soft tissue injuries		Χ		
44b) management of fractures of nasal bones and septum and septal haematoma under local or general anesthesia		Χ		
44c) paranasal sinus fractures	Χ			
44d) fractures of orbit including blowout fractures	Χ			
44e) zygomatic fractures			Χ	
44f) optic nerve decompression			Χ	
44g) reconstruction of anterior skull base			Χ

5. SNORING AND OTHER SLEE	P RELATED BREATHING DISORDERS (SRBD)
History	
	Signature trainer when competency achieved
Non-restful sleep	
Excessive daytime sleepiness	
Loud snoring	
Observed Apnea	
Decreased cognitive functions, depression	

Headaches Clinical examination	
Cimical Examination	Signature trainer when competency achieved
ENT basic examination including: transnasal flexible rhinolaryngoscopy (Müller	
manoeuvre), nasal obstruction, adenoids, tonsil hyperplasia, base of the tonge	
hyperplasia, maxillofacial malformations, pharyngeal and laryngeal obstructions	
Obesity	
Additional diagnostics	
	Signature trainer when competency achieved
Epworth sleepiness scale ESS	
Polysomnographic sleep study, AH-index	
Pulmologist, cardiologist Consultation	
Options: pupillometry, cephalometry, spirometry, blood test, drug induced sleep endoscopy (DISE), daytime sleep studies	
Diseases	
	Signature trainer when competency achieved
Obstructive Snoring	
Upper Airway Resistance Syndrome	
Sleep Apnea Syndrome Obstructive, Central	
Treatment	
Surgical / Nonsurgical: according to the severity of the SRBD	
Primary surgery	
Positive airway pressure Treatment (PAP)	
Reduction of body weight	
Non Surgical Treatment	
	Signature trainer when competency achieved
Drugs: Modafonil in cases of persisting daytime sleepiness symptoms after CPAP	
Oral appliances in mild to moderate OSA	
CPAP, APAP, Bi-level PAP, according to severity of OSA, positional and REM-stage related	
OSA, pressure demand	
Surgical Treatment

Cranial nerve damage		

V. PHONIATRICS

1. DYSPHAGIA

1. DISPHAGIA	
Diseases/Disorders	
	Signature trainer when competency achieved
Benign Disorder	
Oedema of tongue and/or larynx	
Malignant disorder	
Dysphagia after surgery for oral and oropharyngeal cancer	
Dysphagia following hypopharyngeal and/or laryngeal resection	
Dysphagia following radiotherapy of oropharyngeal cancer	
Dysphagia following radiotherapy of hypopharyngeal and/or laryngeal cancer	
Other – Dysphagia caused by	
Apoplectic stroke	
M. Parkinson	
Myasthenia gravis	
Lateral amyotrophic sclerosis	
Dementia	
DISH/M. Forrestier	
Palsy of N. hypoglossus	
History	
	Signature trainer when competency achieved
Specific	
Disturbed swallowing for dry food, liquids	
Coughing during food intake	
Voice changes during food intake	
Nasal regurgitation	
General	
Fever	
Past history of pneumonia	
Loss of body weight	
Clinical Examination	

	S	1 /	A Signature trainer when competency achieved
General			
Assessment of orofacial function		Х	
Assessment of tongue coordination and motion		Х	
Assesssment of velar function		Х	
Function of the Nn. VII, IX, X, XII		Х	
Assessment of oral bolus residua		X	
Endoscopy			
FEES – Fiberoptic endoscopic evaluation of swallowing		X	
Rigid Laryngoscopy (70°, 90°)		Χ	
Esophagoscopy		X	
Esophageal manometry		2	X
Ultrasonography			
Sonography of tongue during swallowing		2	X
Other
